Description: Tenderer demonstrates through one reference to have demonstrable experience in application of algorithms to interrogator data.

Use of this criterion: Used

Criterion:

Type: Other

Use of this criterion: Not used

5.1.10 Award criteria

Criterion:

Type: Price

Name: Award criterion 1 - Tender budget (price)

Description: The award criterion is the most economically advantageous tender on the basis of Awarding on Value. The objective of the Awarding on Value methodology is to challenge tenderers to offer innovative and high-quality products and/or services. The basic idea is that quality is translated into money with the underlying rationale: how much money is it worth to us as the Procurement Team to buy high-quality and/or innovative products /services? The price consists of the offer price as stated in the tender budget (Appendix 3). To clarify: the submitted tender price (Appendix 3) is the amount that actually applies as the contract price. The added value expressed in notional discounts in euro amount(s) are only used to determine the assessment price (notional reduction of the tender price).

Weight (points, exact): 0

Criterion:

Type: Quality

Name: Award criterion 2 - Quality criterion delivery time

Description: ProRail is seeking delivery of the interrogators as soon as possible. Maximum added value is achieved when the delivery is as soon as possible. The delivery time includes both the preparation and the actual delivery of the interrogator at our location in Amersfoort, the Netherlands, after the signing of the contract. Documents to be submitted: Appendix 9. Award criterion 1. Delivery time (completed and signed) A maximum quality value (notional discount) of €45,000 can be achieved for this criterion.

Weight (points, exact): 0

Criterion:

Type: Quality

Name: Award criterion 3 - Plan of approach

Description: It is important for ProRail that the supplier can provide support during both the installation of the interrogators and their implementation. The tenderer will in the plan of approach explain how it intends to implement this process and how it will relieve ProRail of the burden by including: • Description of the scope and responsibilities of the tenderer. • The extent to which the tenderer demonstrates expertise to carry out the work successfully. • Description of how the tenderer will tackle the work within the planning. • A description of what commitment and/or activities are expected from the ProRail and when. • A planning: Overview of the work to be carried out. A maximum quality value (notional discount) of €45,000 can be achieved for this criterion.
