

1. Buyer**1.1 Buyer**

Official name : TenneT TSO B.V.

Activity of the contracting entity: Electricity-related activities

2. Procedure**2.1 Procedure**

Title: Onshore CAR Insurance

Description: In scope for this tender are all construction and maintenance performed onshore by or on behalf of TenneT in both the Netherlands and Germany. For further scope details, see underwriting information. Excluded are Offshore Construction projects where a separate CAR insurance is taken out and Large onshore construction projects in Germany which are performed in a JV where also a separate CAR policy is taken out (SudLink & SudOst link). For this tender and insurances there might be future consequences as the German part of TenneT potentially will be sold to the German government. TenneT decided to not work with two separate contracts but only a contract for TenneT Holding B.V. In case the German activities will be sold, 'TenneT Germany' decides on its own to continue or to tender a new contract after the first contract period. See also the appendix 'contractual clauses (possible) split' attached to the agreement as mentioned at question 1.2.2 in MerCell. This means for Tenderer in case the German activities will be sold: • After the initial contract period extensions will only be used in the Netherlands for TenneT Holding B.V.; • The German part of the activities will be carved out of the scope of the contract of this tender after the initial contract period, but; o TenneT TSO GmbH (& co. KG) (or future legal entity name) will have the option to also use all possible extensions in a separate contract under the same conditions of this tender. Deductibles Current deductible on the policy is EUR 20.000 per claim. For HDD drilling a higher deductible is applicable. Due to current arrangement with contractors in framework agreements it is an objective to maintain these deductibles if possible. Policy wording Coverage is based on All Risks conditions. Major exclusions include war, nuclear reactions and terrorism. For terrorism a limited cover is available for assets located in The Netherlands, based on NHT state scheme. The conditions are considered to be very broad. Opportunities for improvement are limited.

5.1.10 Award criteria

Description of the method to be used if weighting cannot be expressed by criteria: TenneT intends to award the Contract to the Most Economically Advantageous Tender (MEAT) whereby the award criterion Lowest Price (LP) will be applied. The lowest price award criterion is used because the CAR Insurance which is the subject of this tender can be seen a market standard product. Since the wording will be customised during the negotiation phase of this tender and all insurers will use the defined wording during the BAFO phase there are very little differentiators between the qualified insurers left therefore only the premium (lowest price) will be used as award criterion.
